ABSTRACT:

CHG DATE=19990617 STATUS=O>Composition for the mouth and throat contains isotonic natural saline solution, a synthetic or natural antimicrobial agent, a natural flavouring, together with a non-toxic excipient or vehicle suitable for local administration. Saline solution is preferably obtained by diluting sea water to obtain isotonicity either before or after its filtration and optional partial deionisation or partial ion-exchange. Antimicrobial agent may be e.g. phenolic or dihydro aromatic derivative (e.g. guaiacol); biguanides (e.g. chlorhexidine); or boric acid salts. Flavouring is preferably plant essence from e.g. (wild) thyme, oregano, coriander etc. Composition may further contain quat. ammonium antibacterials (e.g. benzalkonium chloride.)
